Parrots Class Newsletter 16.01.17

Hello everyone. I hope you all had a good weekend. We had a very productive week in class last week. It seems that the post- holiday blues have gone and we are fully back into a work mode.

We are still working on the topic of "The world around us" in class. We finished looking at Australia (hot climate) and are going to spend two weeks looking at Antarctica and Iceland (cold climate).

Numeracy

We are going to be having a large focus on measurement for the rest of the term. Pupils have been looking at length so far and will be comparing heights and weights of objects for the remainder of the term.

Science

In our science work has been linked to the topic. We looked at how heat (the sun) can change materials and made volcanoes in class using bicarbonate of soda and vinegar. The topic has created various science learning opportunities for us and the class have done well.

Phonics/ Literacy

This week we are going to be looking at the sh sound and pupils will be writing factual information about Antarctica.

Date for the diary.

Tuesday the 31st of January is parent's evening. There will be letters coming home to you regarding timeslots.

Let's hope for a great week!

Best wishes
Alistair Moger
